

## Microsoft 365 Readiness Assessment

Every company wants their workforce to be more productive and mobile, but most find the idea of a migration to Microsoft 365 to be daunting. With our standardized Microsoft 365 Readiness Assessment, we work with you to mitigate any potential risks of losing or corrupting data during a migration, minimize your downtime, and make the process as quick and seamless as possible while eliminating costly migration issues.

### Readiness Assessment

Comprehensive discovery and requirements analysis phase to determine business needs and drivers, assessment of existing IT architecture, applications, and workloads.

### Results, Analysis, and Documentation

Uncover any issues currently impacting migration, as well as any opportunities for additional improvements down the road with a step-by-step migration plan.

### Recommendations

Consultant led walkthrough with prioritized recommendations to address issues and risks, phase requirements, and estimated timing for successful adoption.

## Why Choose Big Green IT

Business is moving to the Cloud at a rapid pace. At Big Green IT we help companies develop a comprehensive Cloud strategy based on business needs—one that delivers the right technology at the right time and in the right order. We build upon the Microsoft Cloud foundation adding our expertise through consulting, licensing, implementation and support.

Our clients feel confident knowing that they have modern infrastructure with an ecosystem of products and services that are secure, built to work together, supported, and able to grow and pivot as their business needs change.

I had no idea our transition would be so smooth! BGIT was responsive and prompt every step of the way. The nicest team I've ever worked with.
