

Azure Readiness Assessment

Is your IT environment ready for Azure?

This is the question on everyone's mind. Over the past three years the decision has been why and when to migrate to the Cloud with O365. Today we are seeing more and more companies analyzing their next Cloud move with Microsoft Azure. What is the next step?

With the deliverables and recommendations of a Big Green IT Azure Readiness Assessment, you will be able to build a strategic plan for migrating and adopting the Azure platform for key applications.

\$3,990.00*

*Price dependent on size of network and amount of devices.

What We Do

Big Green IT certified engineers collect current physical and VM information including CPU utilization, storage requirements, workload demands, peak workload scenarios, application dependencies, and unique requirements.

How We Do It

Big Green IT uses a tested and proven combination of Microsoft tools, Big Green IT scripts and other third-party tools to collect real time data for a 7-10day period. Big Green IT will also conduct interviews with developers, IT Admins, and key application stake holders.

Deliverables

At the end of this engagement you will receive

- A complete set of all data reports (7-10 day collection period)
- Recommendation on workloads best suited for migration to Azure
- Recommendation on how to migrate workloads to Azure
- Cost Analysis of workloads in Azure
- Suggestions for modernizing applications to take advantage of Azure Micro Services and potentially reduce your monthly cost(s) in Azure.

Common Questions

- What does it cost?
- Which apps or services are best suite/not suited for Azure?
- How do we migrate to Azure?
- What are our recommended next steps?
